SOCIAL DETERMINANTS OF HEALTH AND ORAL HEALTH INFORMATION TECHNOLOGY

November 19, 2020

Learning Objectives

1. Define social determinants of health as they pertain to oral health
2. Highlight examples of practical implementation of the collection of SDOH data
3. Identify opportunities to engage in the collection, reporting and use of SDOH data in dental settings

Housekeeping

- Participants are in audio only mode. If you have questions for the panel please use the Q/A feature.
- A copy of the slides and a link to the recording will be shared after the webinar concludes. They will also be available on the dentaquestpartnership.org website under the **Learn** tab. Select **Webinars**.
- In order to receive CE credit you must fill out the webinar evaluation, which will be shared at the end of the presentation. The evaluation must be completed by **EOD Wednesday, November 25** to receive CE credit. CE certificates will be distributed a few days after the webinar takes place.
- Your feedback is also greatly appreciated.

The DentaQuest Partnership is an ADA CERP Recognized Provider. This presentation has been planned and implemented in accordance with the standards of the ADA CERP.

*Full disclosures available upon request

DentaQuest Partnership Online Learning Center

- Visit our website to access past webinar recordings and earn CE credits upon completion of the online learning modules.
- Sign up for our newsletter to get more information on upcoming webinars.
- <https://www.dentaquestpartnership.org/learn>

The screenshot shows the DentaQuest Partnership website. At the top left is the logo: "DentaQuest Partnership for Oral Health Advancement". On the top right, there are buttons for "Register" and "Sign In", and a link "Sign up for News and Updates" with a red arrow pointing to it. Below the navigation menu, the "Learn" tab is selected. The main content area features a large image of a smiling dentist and the heading "ONLINE LEARNING CENTER". Below this, a paragraph states: "The DentaQuest Partnership Online Learning Center strives to provide engaging resources for anyone looking to implement practice improvement and/or prevention-focused care within their unique environment." A teal banner below the main content contains the text: "If you missed the webinars related to Best Practices for Re-Opening Dental Clinics or Teledentistry you can view the recordings and download the slides. You will also have the option to earn CE credits upon completion of these webinars." At the bottom, a white navigation bar has "Webinars" highlighted with a red arrow.

Question and Answer Logistics

- After the presentations we have time allocated for audience Q&A.
- We are not going to take any questions in between presentations. We will be monitoring the Zoom Q&A box through the entire presentation and we will do our best to answer all of your questions at the end.

Type your question in the **Question and Answer** box.

A screenshot of a mobile application window titled "Polls". The window has a green header bar with the text "Example 1". Below the header, the question "1. What is your favorite color?" is displayed. There are eight radio button options listed vertically: Red, Orange, Yellow, Green, Blue, Indigo, and Violet. At the bottom of the window, there is a grey bar with the text "Submit".

SOCIAL DETERMINANTS OF HEALTH

Rural Health Day

Closing the gap in a generation

Health equity through action on the social determinants of health

"This ends the debate decisively. Health care is an important determinant of health. Lifestyles are important determinants of health. But... it is factors in the social environment that determine access to health services and influence lifestyle choices in the first place."

- Director-General Dr Margaret Chan, at the launch of the final report of the CSDH in 2008

Figure 2

Impact of Different Factors on Risk of Premature Death

SOURCE: Schroeder, SA. (2007). We Can Do Better — Improving the Health of the American People. *NEJM*. 357:1221-8.

Definition

The social determinants of health are the conditions in which people are born, grow, live, work and age that shape health.

- Kaiser Family Foundation

Definition (cont.)

“...it is the understanding that when available, access to resources and technical assistance is often socially determined.¹”

Social Determinants of the Health of Urban Populations: Methodologic Considerations (NCBI)

How SDOH will influence the next wave of health tech startups

The industry already has seen some startups working with social determinants of health. Their number will only increase as healthcare moves to value-based care and needs more data.

By [Bill Siwicki](#) | September 30, 2019 | 01:13 PM

"If we can collect standardized SDOH data at the individual level, it must also be incorporated into population health management platforms to inform care coordination efforts."

— Joanne Lin, Newark Venture Partners

Value-based care driving SDOH

With a goal of providing the best outcomes at an optimal price, stakeholders must now expand their scope to address the social determinants of health, too, Lin said. Ultimately, this paradigm shift supports payers and providers in aligning social needs and clinical care, she added.

Overview

Business Drivers

There is broad consensus that SDOH information improves whole person care and lowers cost. Unmet social needs negatively impact health outcomes.

- **Food insecurity** correlates to higher levels of diabetes, hypertension, and heart failure.
- **Housing instability** factors into lower treatment adherence.
- **Transportation barriers** result in missed appointments, delayed care, and lower medication compliance

One of the biggest barriers to addressing social risk and social needs in clinical settings is the limited standards available to represent the data.

Key Learning: Despite increased interest around identifying and addressing SDOH in context of US health care settings, existing medical coding vocabularies and health information exchange standards are poorly equipped to capture related activities.

Enter the Gravity Project...

Goal

Develop consensus-driven data standards to support use and exchange of social determinants of health (SDOH) data within the health care sectors and between the health care sector and other sectors.

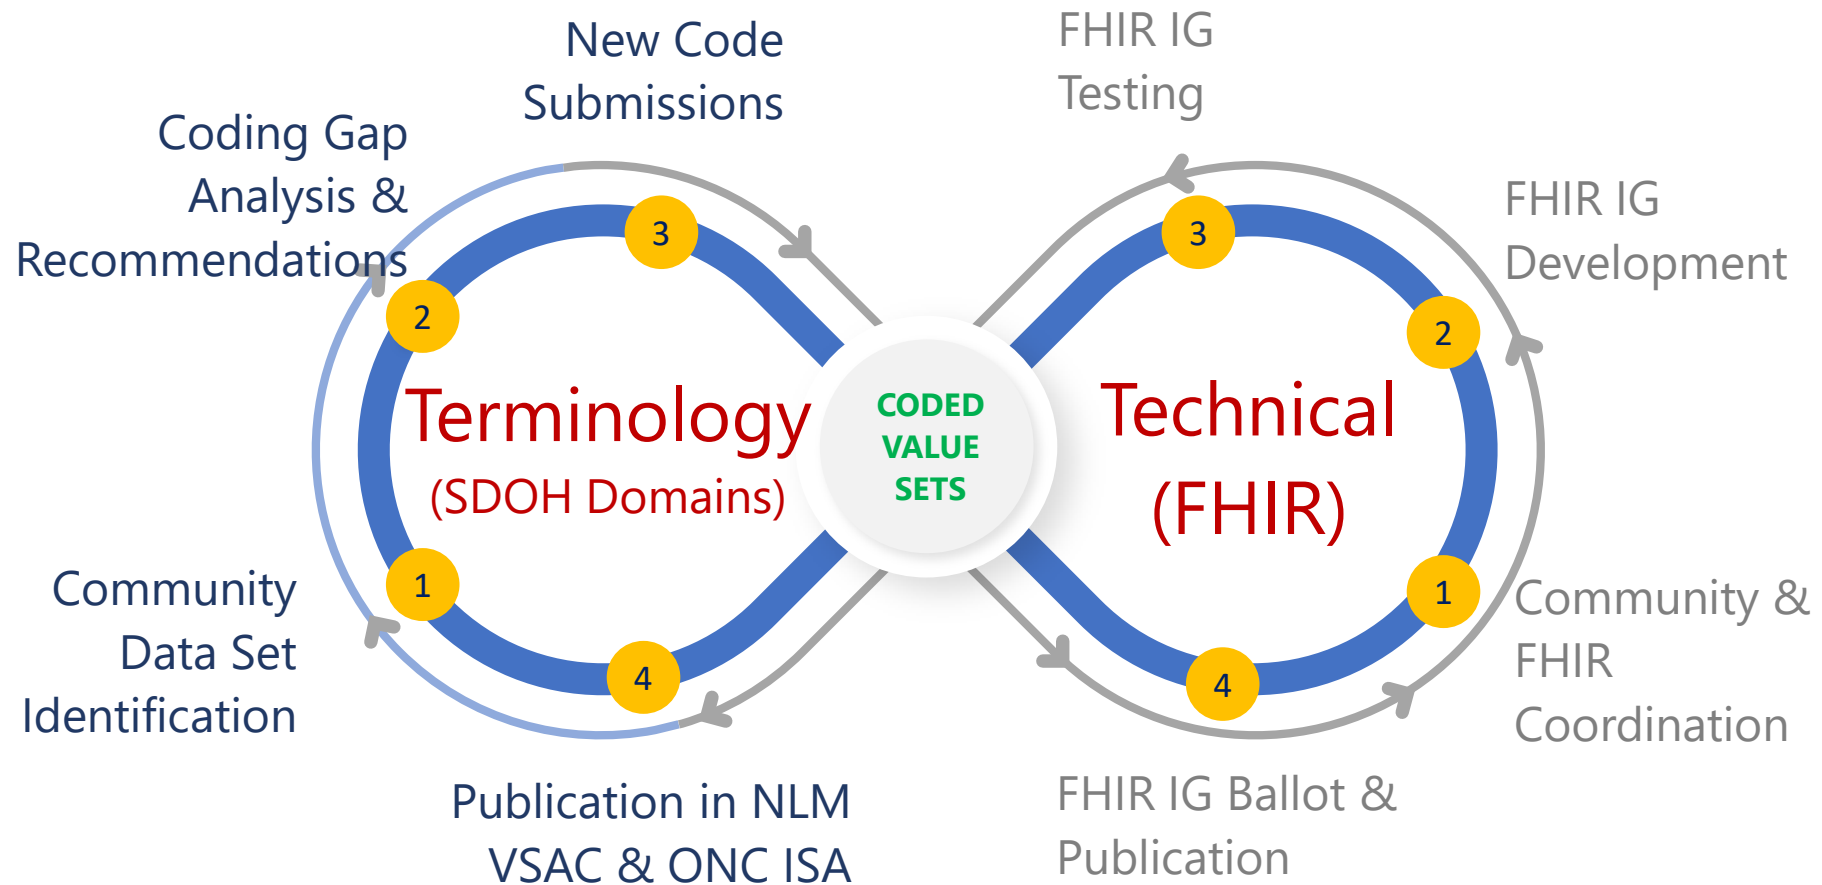

Project Scope

In May 2019, the [Gravity Project](#) was launched as a multi-stakeholder public collaborative with the goal to develop, test, and validate standardized SDOH data for use in patient care, care coordination between health and human services sectors, population health management, public health, value-based payment, and clinical research.

The Gravity Project was initiated by the Social Interventions Research and Evaluation Network (SIREN) with funding from the Robert Wood Johnson Foundation and in partnership with EMI Advisors LLC.

Gravity Project Scope: Develop data standards to represent patient level SDOH data documented across four clinical activities: screening, assessment/diagnosis, goal setting, and treatment/interventions.

Terminology Workstream

Terminology Workstream

Data Element and Gaps Analysis Work

For each domain:

- What concepts need to be documented across the following activities?
- What codes reflecting these concepts are currently available? What codes are missing?

SDOH Terminology Domains

12/4 ICD-10
Submission

2019

- Food Insecurity

2020

- Housing Instability and Homelessness
- Inadequate Housing
- Transportation Insecurity
- Financial Strain – **Screening and Diagnoses**
- Education - **Screening and Diagnoses**
- Employment - **Screening and Diagnoses**
- Veteran status - **Screening and Diagnoses**

2021 – Established

- Financial Strain – **Goals and Interventions**
- Education - *Goals and Interventions?*
- Employment - *Goals and Interventions?*
- Veteran status - *Goals and Interventions?*

2021- New

- Social Isolation- **Screening and Diagnoses**
- Stress - **Screening and Diagnoses**
- Interpersonal Violence - **Screening and Diagnoses**

Perspectives on Data

What **kinds of data** does the provider need to care for their patients?

- the hospital need to study the effects of provider interventions?
- the WIC office or food bank need to address the need of their clients?
- the state need to plan for population health needs?

And what are the principles we need to consider to keep patients at the center?

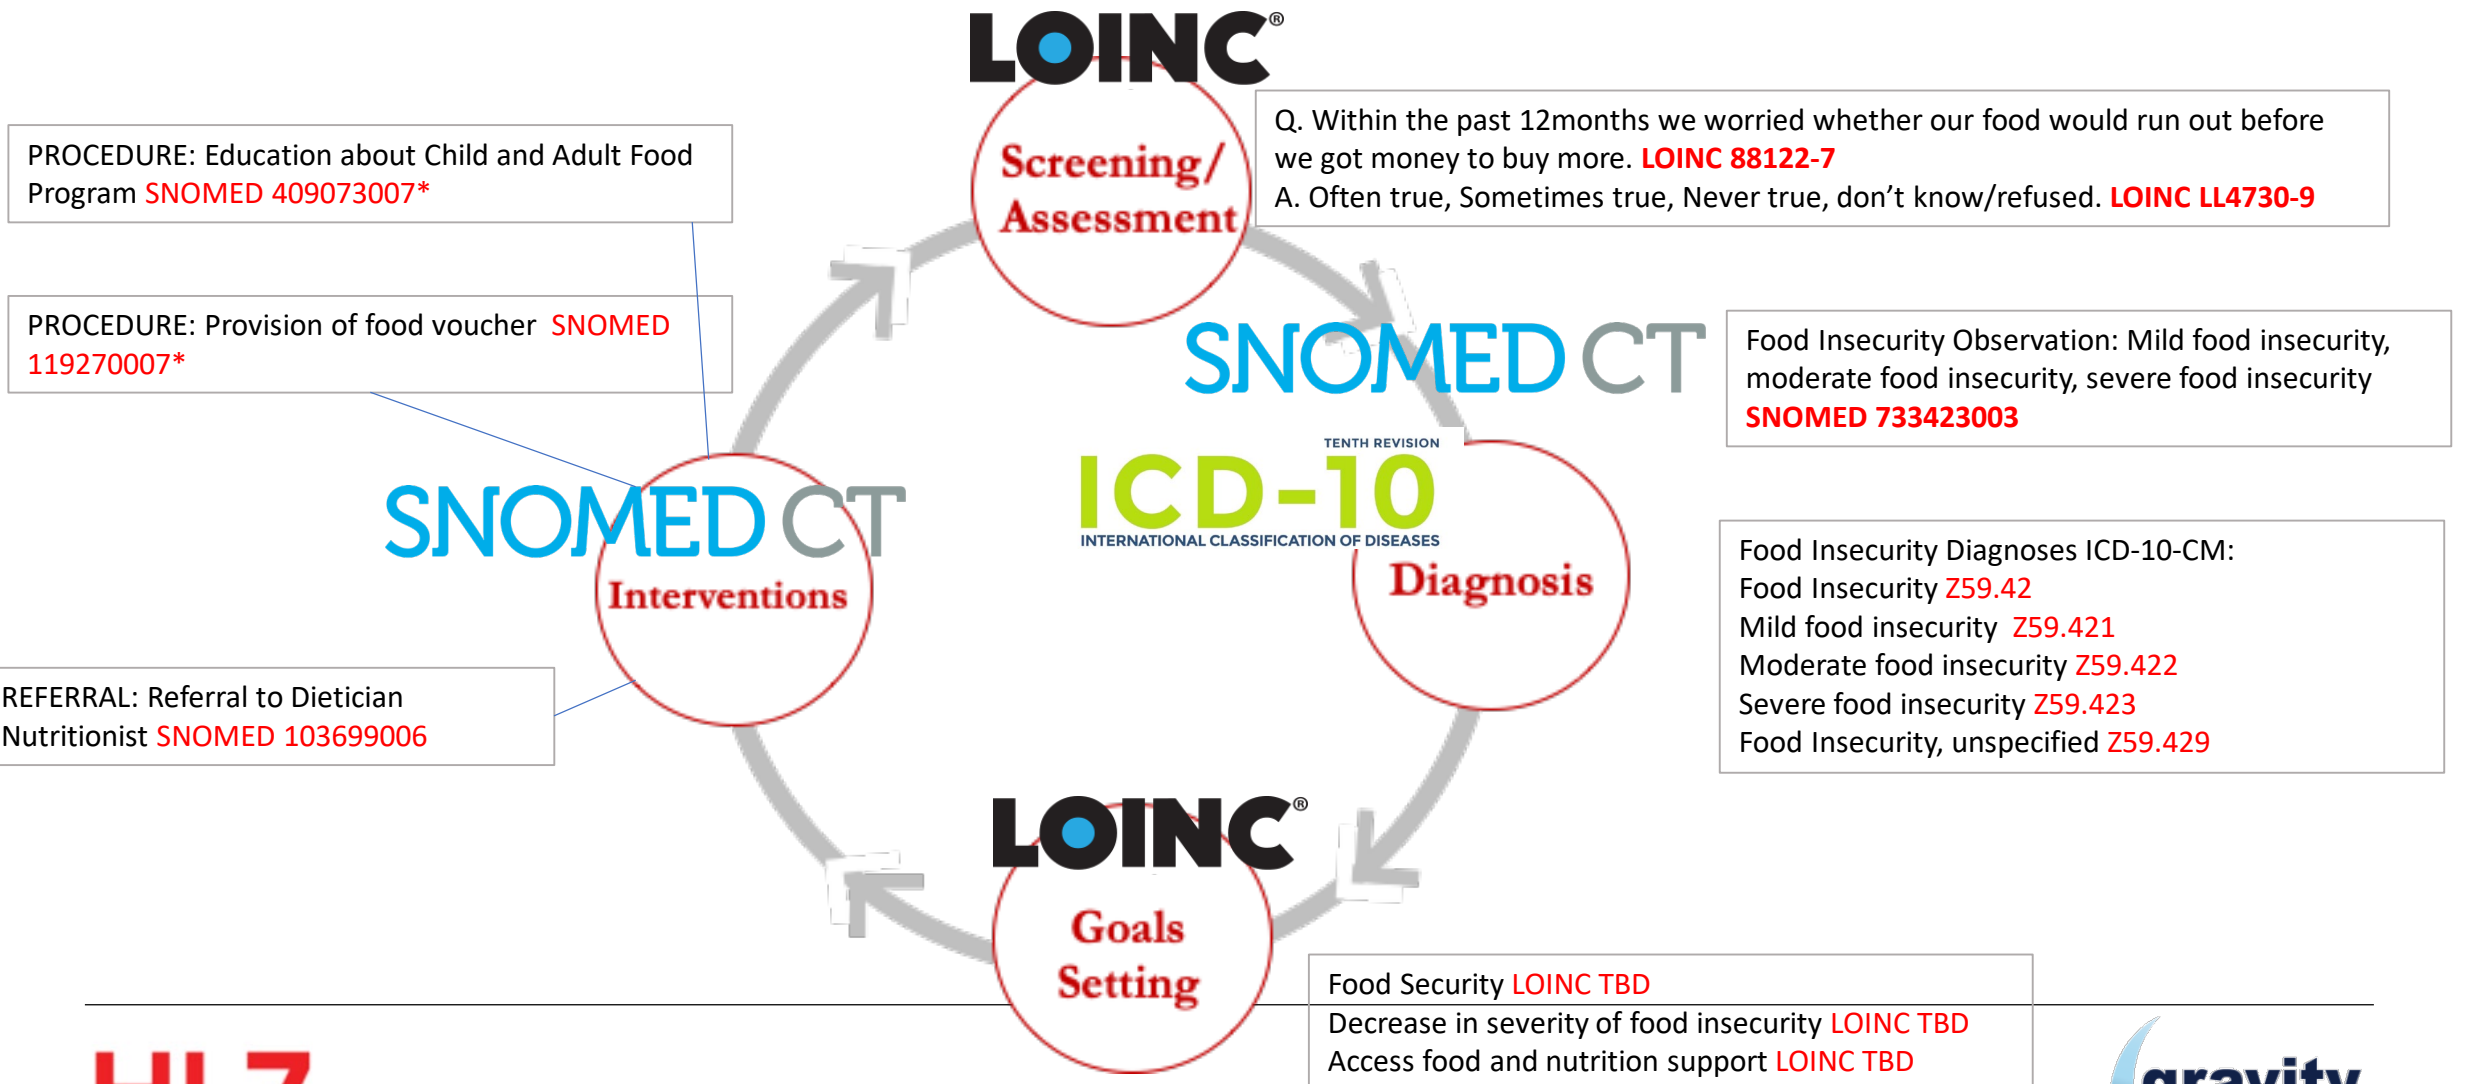

Gravity Project Data Use Principles for Equitable Health and Social Care

- Improving Personal Health Outcomes
- Improving Population Health Equity
- Ensuring Personal Control
- Designing Appropriate Solutions
- Ensuring Accountability
- Preventing, Reducing, and Remediating Harm

<https://confluence.hl7.org/display/GRAV/Gravity+Data+Principles>

Food Insecurity Terminology Build

Food Insecurity: Building Concepts Into Code

- **Food Insecurity Screening Tools-** LOINC V2.68 released 6/17/20
 - The three USDA Screeners submitted by Gravity are included in this release (U.S. Household Food Security (18), U.S. Adult Food Security (10), U.S. Household Short Form (6)
 - Additional screeners from the Food Insecurity Master List are being prepared to submit for consideration in the December LOINC release.
- **Diagnoses/Problems and Interventions-** SNOMED CT
 - Submitted concepts are currently being reviewed by SNOMED
- **Diagnoses-** ICD-10
 - Food insecurity diagnoses from the master list have been submitted for review

<https://confluence.hl7.org/pages/viewpage.action?pageId=55938680#FoodInsecurityDomain-CodingSubmissions>

Technical Workstream

Gravity & FHIR

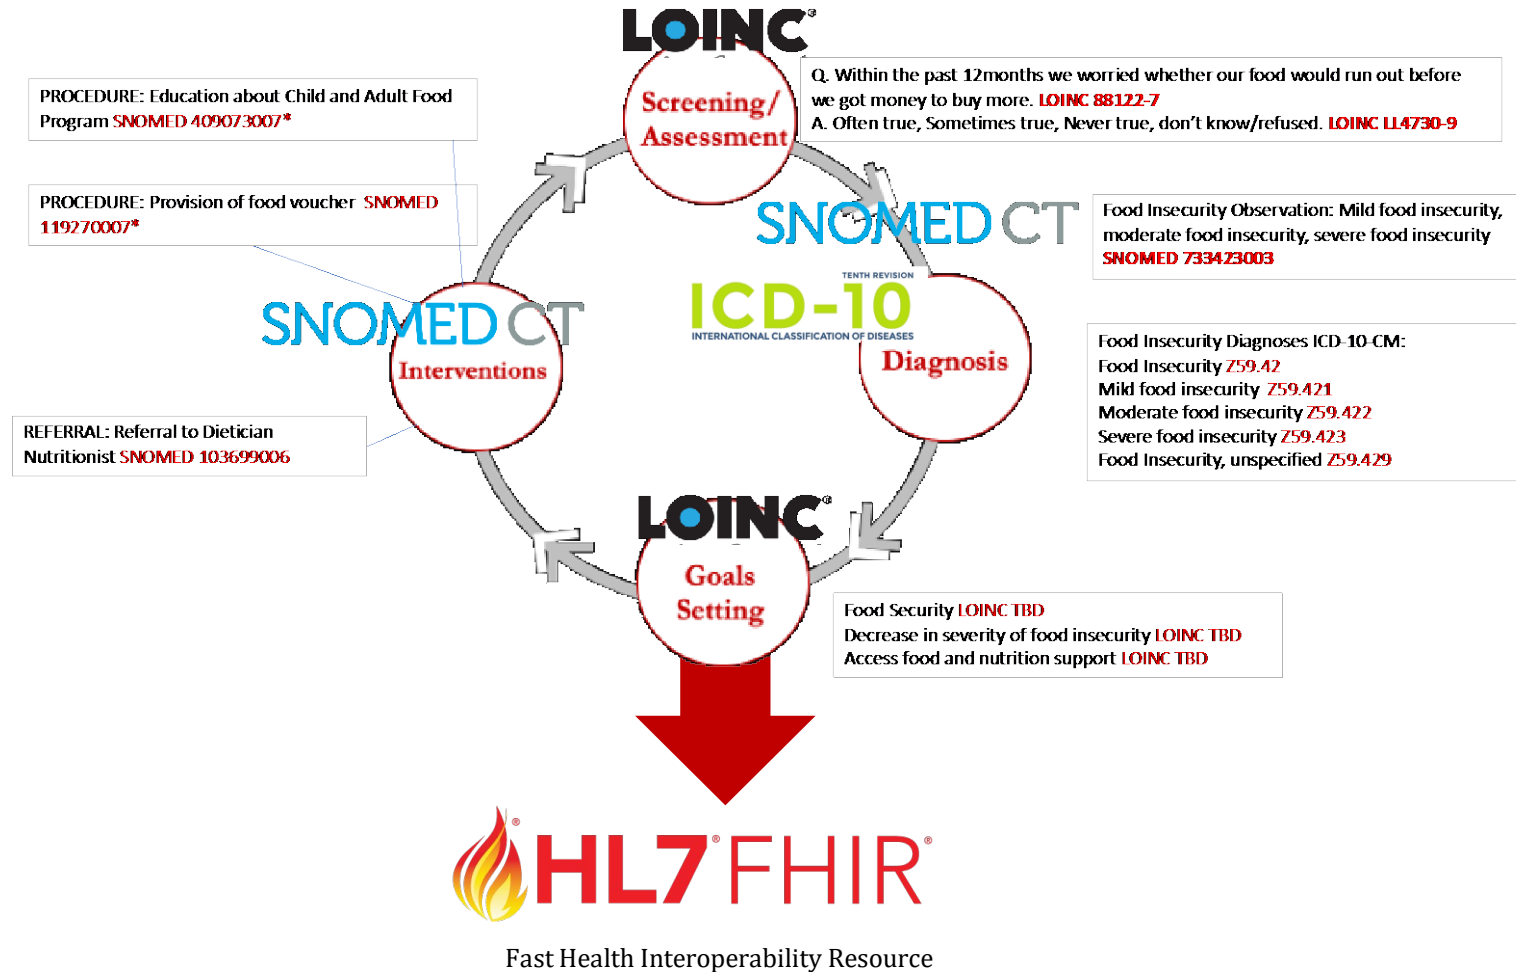

HL7® FHIR® Accelerator Program

- Designed to assist implementers across the health care spectrum in the creation of FHIR Implementation Guides or other informative documents
- Gravity Project became an official Accelerator in August 2019:

http://www.hl7.org/documentcenter/public_temp_3840821C-1C23-BA17-0C64E3ACBE05D630/pressreleases/HL7_PRESS_20190820.pdf

Accelerating Adoption Using Nationally Recognized Standards

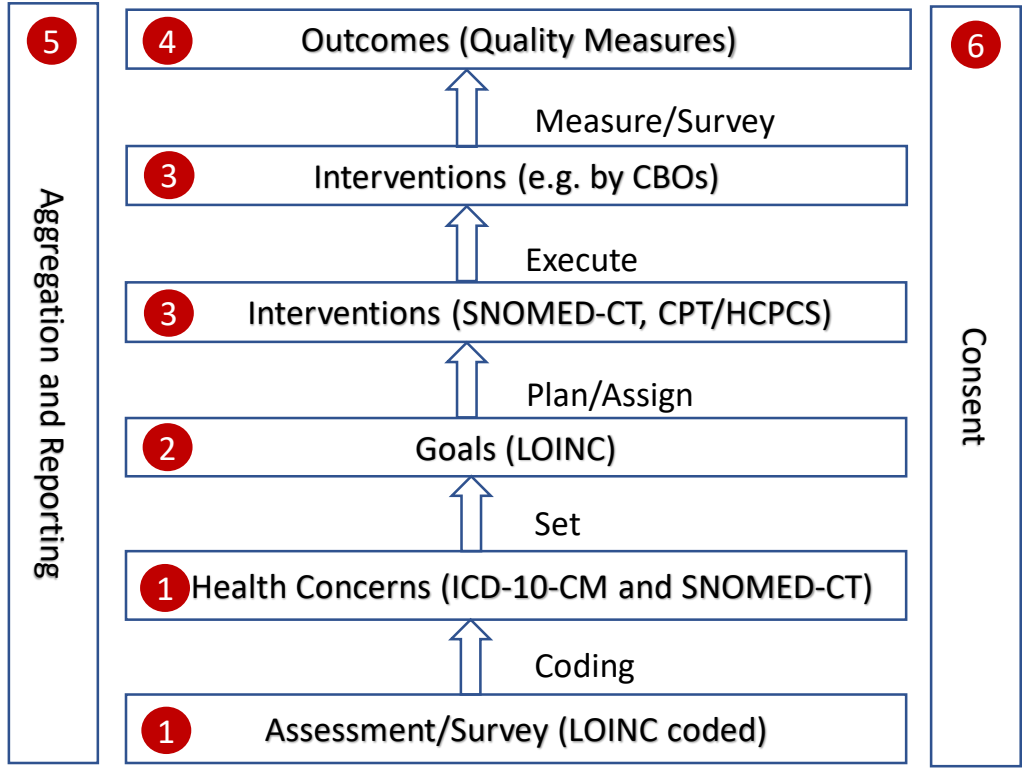

Technical Stream – FHIR IG Focus

1. Redesigning the FHIR IG to support multiple domains
 - Working on new FHIR methods to allow value sets to “flex” based on the domain requirements
2. Support for exchange of information related to SDOH primary clinical activities related to SDOH
3. Plan to ballot STU1 version of the FHIR IG in the January ballot cycle
It is important to remember that the IG is a definition of how to represent SDOH information for exchange. (e.g. via a FHIR based API – conformant to the ONC 21st Century Cures Act final rule)
4. Planning for January HL7 Connectathon 26

Gravity FHIR SDOH Clinical Care IG Scope

- 1 Document SDOH data in conjunction with the patient encounter
- 2 Set SDOH related goals.
- 3 Establish interventions to completion.
- 4 Measure outcomes.
- 5 Gather and aggregate SDOH data or uses beyond the point of care (e.g. population health management, quality reporting, and risk adjustment/ risk stratification).
- 6 Manage patient consent

<http://build.fhir.org/ig/HL7/fhir-sdoh-clinicalcare/>

Accomplishments & Success Factors

Accomplishments & Success Factors

- **June 2019:** Published comprehensive [use case package](#)
- **July 2019:** Launched food insecurity domain.
- **November 2019:** Published the final [food insecurity data set](#) and received national recognition in Department of Health & Human Services (HHS) Roundtable on [“Leveraging Data on the SDOH”](#) Report
- **January 2020:** Completed food insecurity coding gap analysis recommendations.
- **March 2020:** Launched [housing instability](#) domain.
- **May - June 2020:** Submitted [new code applications](#) for food insecurity
- **May 2020:** Tested draft [HL7 FHIR SDOH Implementation Guide \(IG\)](#) at two FHIR Connectathons; achieved 1st place status in competition.
- **Sept 2020:** Tested HL7 FHIR SDOH IG at FHIR Connectathon; launch Transportation Domain; complete Housing Domain
- **Oct 2020:** Launch financial strain and demographics domains in parallel
- **November 2020:** Target food insecurity value set publications in NLM Value Set Authority Center (VSAC) and ONC Interoperability Standards Advisory.
- **December 2020:** ballot-ready [FHIR SDOH Implementation Guide](#).

- **POLICY:** (e.g. ONC USCDI, CMS Promoting Interoperability, State Medicaid Director Letters)
- **PAYMENT MODELS:** (e.g. CMMI SDOH Model)
- **PROGRAMS:** (e.g. Medicare Advantage, Medicaid Managed Care, Hospital QRRP, MIPS).
- **GRANTS:** (e.g. ACL Challenge Grant, ONC Health IT LEAP, RWJF SDOH Integration in Clinical Care).
- **PRACTICE:** (e.g. repeatable process for adoption, implementation, and use of SDOH data at practice level.
- **INNOVATION:** New tools for capture, aggregation, analytics, and use.

Gravity Project's Submission to USCDI: A New SDOH Data Class!

- ONC announced that the United States Core Data for Interoperability (USCDI) is open for submissions through October 23, 2020.
- The Gravity Project formally submitted our collective work as a new SDOH data class.
- Members of the Gravity Community also made submissions to ONC's USCDI v2 building on the Gravity Project's work.
- On November 4, ONC categorized our submitted SDOH data class as Level 2:
 - Level 2 data elements demonstrate extensive existing use in systems and exchange between systems, and use cases that show significant value to current and potential users. These data elements would clearly improve nationwide interoperability. Any burdens or challenges would be reasonable to overcome relative to the overall impact of the data elements.
 - Level 2 data classes/elements will be considered for USCDI V2 Draft based on ONC assessment of a number of factors, including impacts for potential users, maturity of data and technical standards/implementation specifications, burden for implementation, etc.

Gravity Project's submission for USCDI version 2

Domains / Data Elements

Oral Health Information Technology Virtual Convening Session: Social Determinants of Health and Oral Health IT

Using PRAPARE to Collect Data on the Social Determinants of Health and Advance Health Equity *November 19, 2020*

THE NACHC MISSION

America's Voice for Community Health Care

The National Association of Community Health Centers (NACHC) was founded in 1971 to promote efficient, high quality, comprehensive health care that is accessible, culturally and linguistically competent, community directed, and patient centered for all.

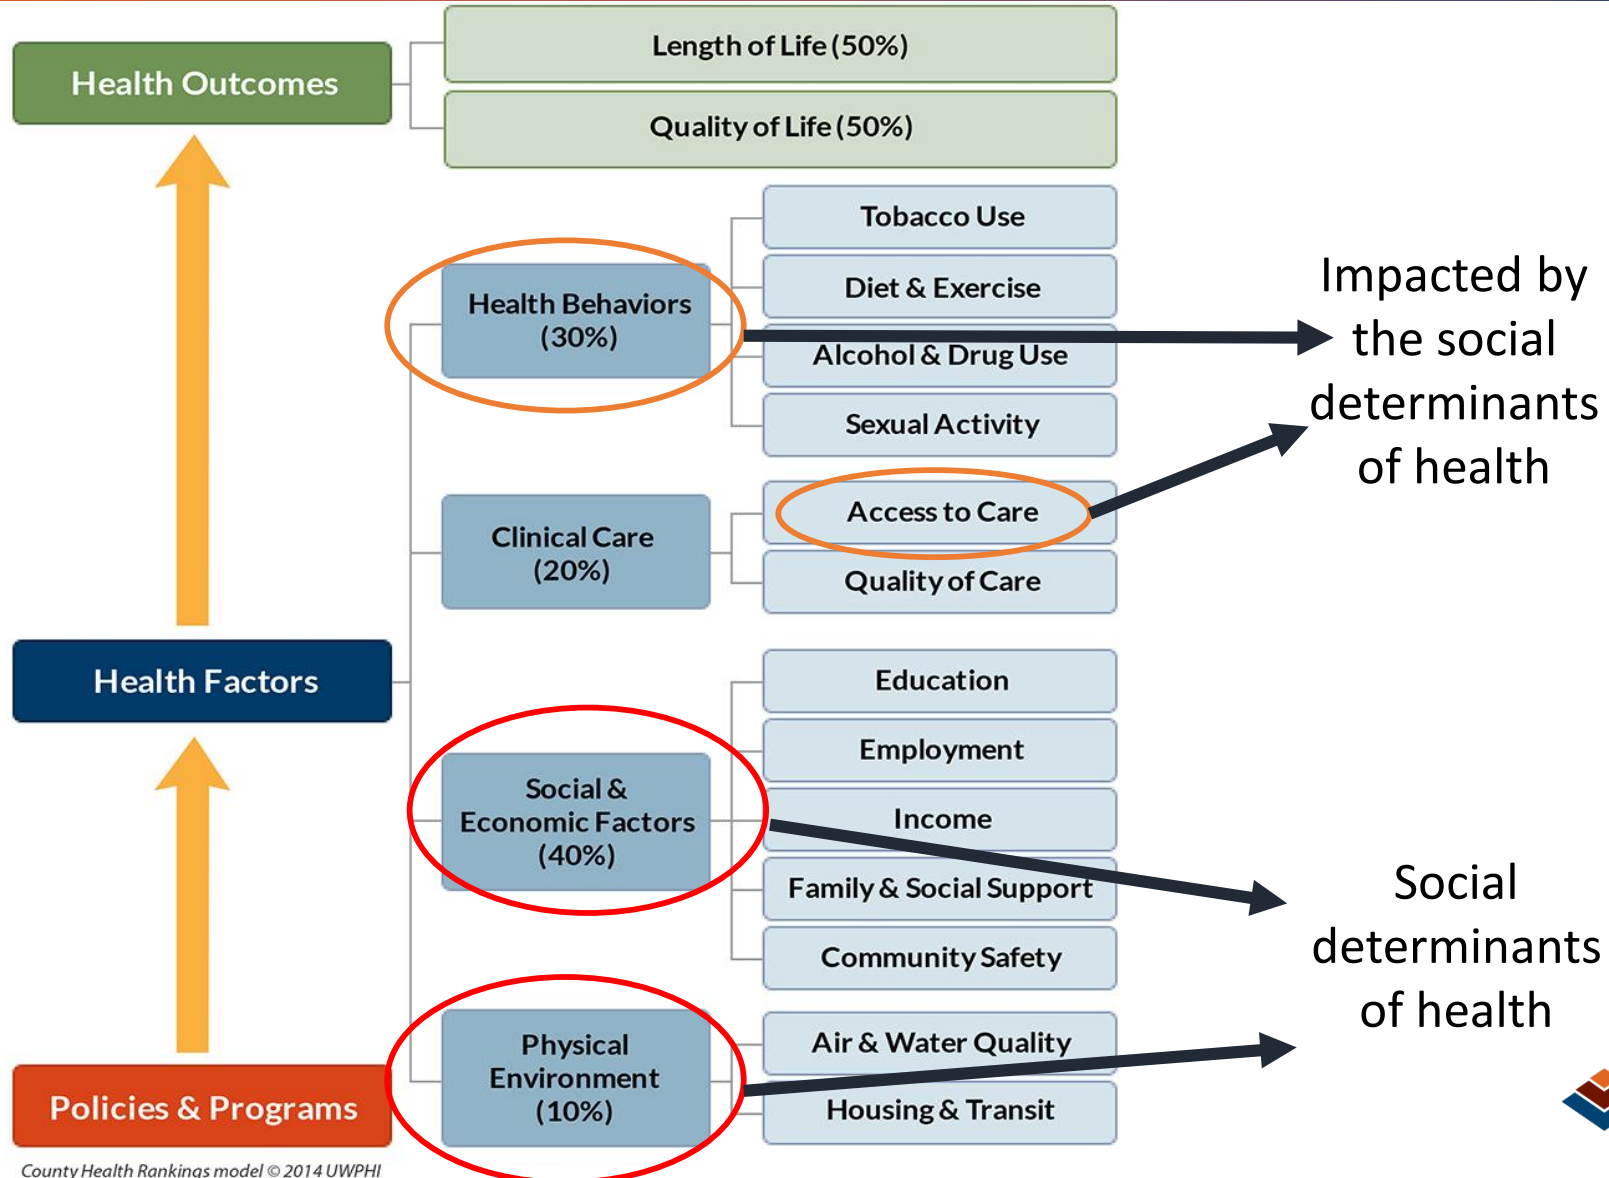

Important Definitions

- 1. Social determinants of health:** the conditions in which people are born, grow, live, work, and age. These conditions are shaped by the distribution of money, power, and resources.
- 2. Social risk factors:** specific adverse social conditions that are associated with poor health.
- 3. Social needs:** patient's role in identifying and prioritizing social interventions.
- 4. Population health:** the health outcomes of a group of individuals, including the distribution of such outcomes within the group.

Source: AAFP <https://www.aafp.org/news/practice-professional-issues/20190610sdohterms.html>

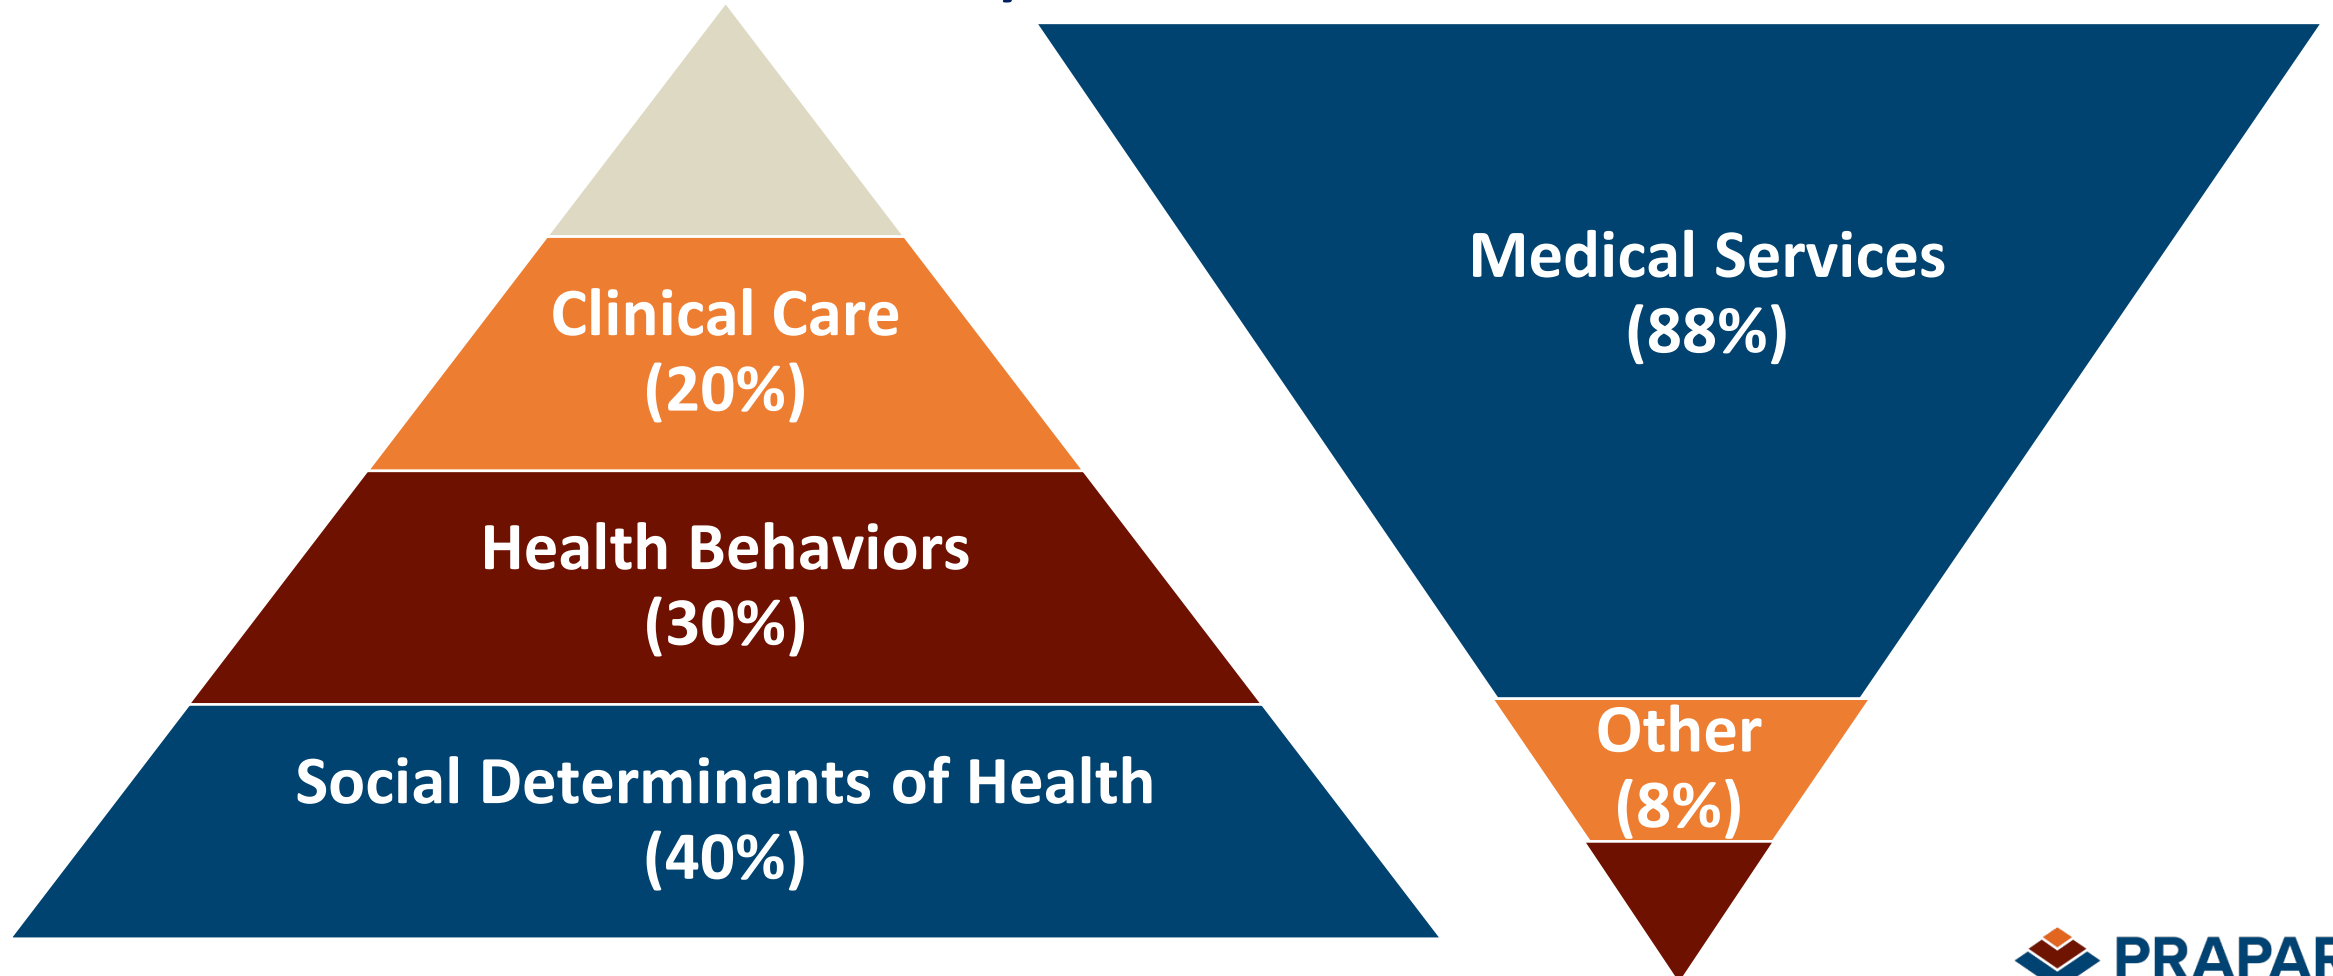

Why Are the Social Determinants of Health Important?

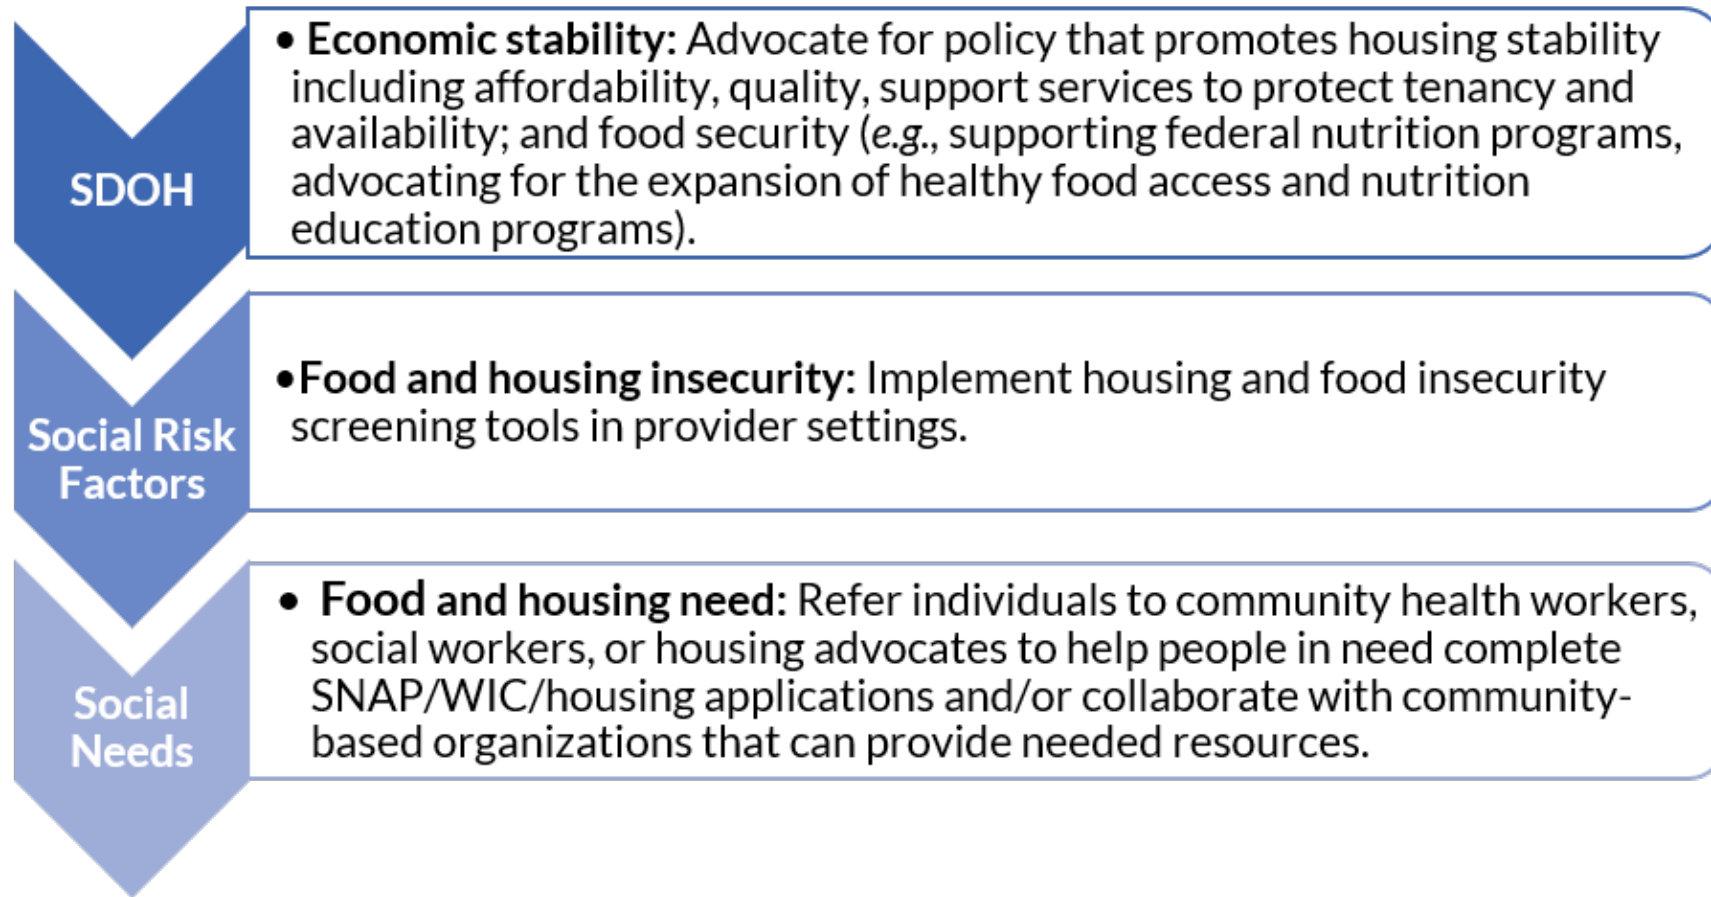

Why is it Important to Focus on Social Determinants?

What **Makes** Us Healthy

What We **Spend** On Being Healthy

Examples of interventions across the continuum

Source: Health Affairs <https://www.healthaffairs.org/doi/10.1377/hblog20191025.776011/full/>

Why collect SDOH data?

1

Define and document the increased complexity of patients

2

Better target clinical care, enabling services, and community partnerships to drive care transformation

3

Enable providers to demonstrate the value they bring to patients, communities, and payers

4

Advocate for change at the community and national levels

Advancing Health Equity

- Health inequities are reflected in differences in length of life; quality of life; rates of disease, disability, and death; severity of disease; and access to treatment.
- Health equity is achieved when every person has the opportunity to “attain full health potential” and no one is “disadvantaged from achieving this potential because of social position or other socially determined circumstances.”

PRAPARE's Evidence-Base and Stakeholder-Driven Development Process

What questions are in PRAPARE?

Core	
1. Race*	10. Education
2. Ethnicity*	11. Employment
3. Veteran Status*	12. Material Security
4. Farmworker Status*	13. Social Isolation
5. English Proficiency*	14. Stress
6. Income*	15. Transportation
7. Insurance*	16. Housing Stability
8. Neighborhood*	
9. Housing Status*	

Optional	
1. Incarceration History	3. Domestic Violence
2. Safety	4. Refugee Status

Optional Granular	
1. Employment: How many hours worked per week	3. Insurance: Do you get insurance through your job?
2. Employment: # of jobs worked	4. Social Support: Who is your support network?

* UDS measures are automatically populated into PRAPARE EHR templates. You do NOT need to ask those questions multiple times!

Find the tool at www.nachc.org/prapare

Why use PRAPARE to Collect SDOH?

- **STANDARDIZED and WIDELY USED**
 - Measures Linked with standardized codes (ICD-10, LOINC, SNOMED)
 - Dominant SDOH risk screening tool used by health centers and Medicaid managed care organizations
- **EVIDENCE-BASED and STAKEHOLDER-DRIVEN**
 - Developed and tested by health centers
- **FREE EHR Templates**
- **FREE PRAPARE Implementation and Action Toolkit**
 - Accompanying resources, best practices, & lessons learned to guide users on PRAPARE implementation
- **WORKFLOW AGNOSTIC**
 - Can fit within existing workflows and be combined with other tools/data
- **PATIENT-CENTERED and ACTIONABLE**
 - Meant to facilitate conversations and build relationships with patients
 - Standardize the need rather than the question

PRAPARE Coding and Data Dictionary

- Crosswalks include ICD-10, LOINC, SNOMED
- Many PRAPARE EHR templates have used crosswalks to map PRAPARE measures to ICD-10 codes
- New proposed codes for PRAPARE in LOINC and ICD-10
- PRAPARE Data Documentation available in Toolkit

Material Security							
Rationale:	Material security encompasses both presence of resources and presence of skills and knowledge to manage resources. It is common in households that have material insecurity that patients must make tradeoffs prescription in order to put food on the table. Overall material security has been linked to many disparities (IOM, Phase I Report, 2014). Material insecurity has a validated relationship with forgoing care and wi

ORIGINAL PAPER

Collecting Social Determinants of Health Data in the Clinical Setting: Findings from National PRAPARE Implementation

Rosy Chang Weir, PhD
Michelle Proser, PhD, MPP
Michelle Jester, MA, MPP
Vivian Li, MS
Carlyn M. Hood-Ronick, MPA, MPH
Deborah Gurewicz, PhD

Abstract: Background. The Protocol for Responding to and Assessing Patient Assets, Risks, and Experiences (PRAPARE) is a nationally recognized standardized protocol that goes beyond medical acuity to account for patients' social determinants of health (SDH). **Aims.** We described the magnitude of patient SDH barriers at health centers. **Methods.** Health centers across three PRAPARE implementation cohorts collected and submitted PRAPARE data using a standardized data reporting template. We analyzed the scope and intensity of SDH barriers across the cohorts. **Results.** Nationally, patients faced an average of 7.2 out of 22 social risks. The most common SDH risks among all three cohorts were limited English proficiency, less than high school education, lack of insurance, experiencing high to medium-high stress, and unemployment. **Conclusions.** Findings demonstrated a high prevalence of SDH risks among health center patients that can be critical for informing social interventions and upstream transformation to improve health equity for underserved populations.

Key words: Social determinants of health, community health center, vulnerable populations, health equity, complex patients, safety net, underserved populations, social risk factors.

There is growing consensus over the past few decades that a wide array of social and community-level risk factors—such as food insecurity, homelessness, lack of transportation, and unemployment—drive health and wellbeing as well as health care expenditures.¹ Health care providers face increasing expectations to lower health

© Meharry Medical College Journal of Health Care for the Poor and Underserved 31 (2020): 1018–1035.

Pilot Findings: Most Common SDOH Risks and Assets

- **Most Common Social Determinant Risks**
 - Limited English Proficiency (32%)
 - Less than High School Education (32%)
 - Uninsured (25%)
 - Experiencing High to Medium High Stress (24%)
 - Unemployment (18%)
- **Most Common Social Determinant Assets**
 - Socially integrated (> 50% of patients see those they care about 5+ times a week)

PRAPARE IMPLEMENTATION AND ACTION TOOLKIT

www.nachc.org/prapare

Chapter 1: Understand the PRAPARE Project

Chapter 2: Engage Key Stakeholders

Chapter 3: Strategize the Implementation Process

■ **Chapter 4: Technical Implementation with EHR Templates**

■ **Chapter 5: Develop Workflow Models**

■ **Chapter 6: Develop a Data Strategy**

■ **Chapter 7: Understand and Evaluate Your Data**

■ **Chapter 8: Build Capacity to Respond to SDH Data**

■ **Chapter 9: Respond to SDH Data with Interventions**

■ **Chapter 10: Track Enabling Services**

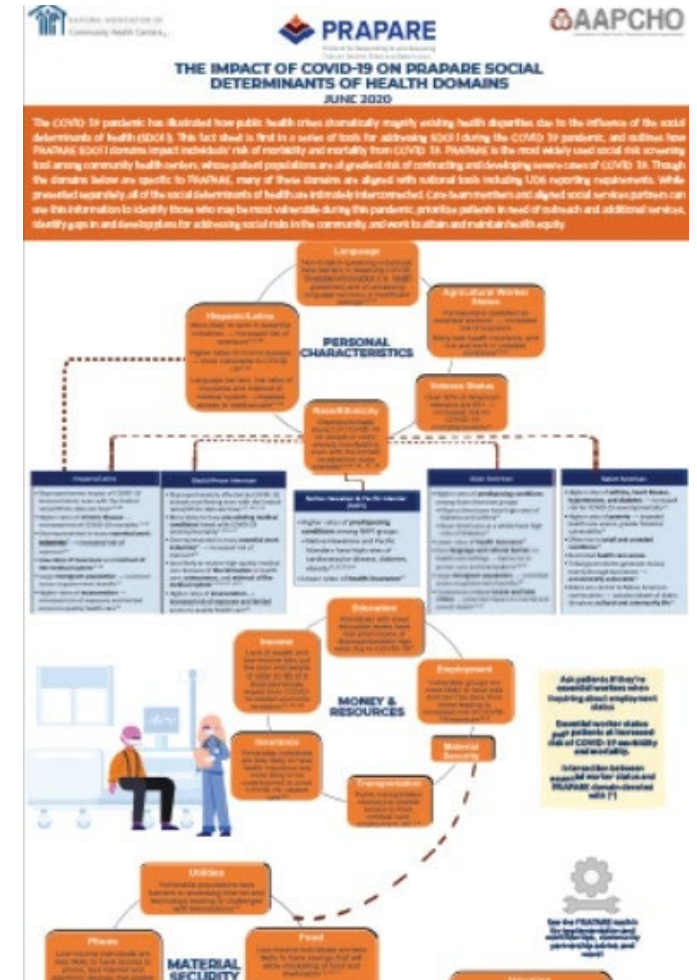

PRAPARE SDOH & COVID-19 Fact Sheet

Fact Sheet: The Impact of COVID-19 on PRAPARE Social Determinants of Health Domains

This fact sheet outlines how PRAPARE SDOH domains impact individuals' risk of morbidity and mortality from COVID-19. Care team members and aligned social service partners can use this information to identify those who may be most vulnerable during the pandemic, prioritize patients in need of outreach and additional services, and develop plans for addressing social risks in the community.

SDOH – Our approach...WHY?

- ▶ Screening for SDOH – Identification of needs, Address patient needs and Improve patient experiences
- ▶ 1815 Grant (OACHC/NACHC/CDC/ODH)
 - ▶ Undiagnosed/uncontrolled diabetes and hypertension patients, statin therapy for prevention and treatment of CAD; Clinical Pharmacy referrals; and Social Determinants of Health (SDOH)
- ▶ HCCN Grant (OACHC) – Focus on enhancing patient and provider experience, advancing interoperability, and use data to enhance value.

The screenshot shows a web browser window with the URL `auntbertha.com/widget/660x234?c=2F8BC5&d=connectva`. The browser's address bar includes navigation icons (back, forward, refresh) and a star icon for bookmarks. Below the address bar is a blue navigation bar with icons for a medical cross, a fork and knife, a bus, a heart with a pulse line, a shopping cart, a group of people, a house, a dollar sign, a graduation cap, and a briefcase. The main content area features the text "Find food, health, housing and employment programs in seconds." followed by a "Zip" input field and a "Search" button. Below this text is the logo for "CONNECT VA" with the text "Provided by:". At the bottom right of the page, there is a small cartoon character and the text "powered by Aunt Bertha".

SDOH - Process

- ▶ PRAPARE Screening Form - Paper process > Electronic Form > Identification of Need > Referral to Care Team or Provide Community Resource Brochure)
- ▶ Why Structured?
 - ▶ **Data...Data...Data**
 - ▶ Reporting- Identify highest area of needs. Prioritize.
- ▶ Goals
 - ▶ Build/strengthen relationships
 - ▶ Improve patient satisfaction
 - ▶ Increase patient engagement
 - ▶ Improve patient outcomes

DATA

KNOWLEDGE

ACTION

HIE Integration

- ▶ Structured Data
- ▶ Ongoing Data Validation
- ▶ Interoperability – Make connections
- ▶ Community Health Record

Disease Management

- ▶ Smoking Cessation
 - ▶ Clinical Pharmacy Shared Visits
- ▶ Elevated Blood Pressure
 - ▶ HTN Clinic/Referrals
 - ▶ Warm Handoff to PCP
- ▶ Diabetes
 - ▶ Comprehensive education class
 - ▶ PCP Room Flyers on Dental Complications
 - ▶ Clinical Pharmacy Shared Visits

Diabetes & Oral Health

Diabetics are more susceptible to infections - putting them at an increased risk of getting gum disease!¹

Diabetics with gum disease who receive more frequent dental cleanings are healthier with lower blood glucose levels.²

Dentists are trained to diagnose and spot the warning signs of diabetes!

1 in 5 cases of tooth loss is linked to diabetes²

Keep teeth & gums strong!

Visit the dentist - they can prevent and treat side effects

Keep blood glucose levels under control³

Maintain good oral hygiene - brush and floss daily!
